ASVAB Scoring Guide

Regardless of which branch of the US military you wish to enlist in, you will be required to achieve a minimum Armed Forces Qualification Test (AFQT) score. Your AFQT score is determined by combining your scores from four sections of the ASVAB:

- Arithmetic Reasoning (AR)
- Mathematics Knowledge (MK)
- Paragraph Comprehension (PC)
- Word Knowledge (WK)

So, what's the point of the rest of the ASVAB sections? The AFQT score just determines your eligibility to enlist in the military at all. Once you've qualified to enlist by achieving a passing AFQT score, your performance on the ASVAB as a whole can help jump-start your military career by increasing the odds of landing the assignment you want.

AFQT Category	Percentile
I	93-99
II	65-92
IIIA	50-64
IIIB	31-49
IV	10-30
V	1-9

The AFQT is scored as a percentile between 1 and 99. The reference group that the percentile is based on is a sample of 18- to 23-year-olds who took the ASVAB back in 1997. This means that if your AFQT score is, say, 77, you scored as well as 77% of the 1997 sample group.

Section Domain	Description
General Science (GS) <i>Science/Technical</i>	Physical science and biology
Arithmetic Reasoning (AR) <i>Math</i>	Solving arithmetic word problems
Word Knowledge (WK) <i>Verbal</i>	Understanding the correct meaning of words and their best synonyms presented in context
Paragraph Comprehension (PC) <i>Verbal</i>	Obtaining information from written passages
Math Knowledge (MK) <i>Math</i>	Principles of high school math
Electronics Information (EI) <i>Science/Technical</i>	Electronics and electricity
*Auto Information (AI) <i>Science/Technical</i>	Automobile technology
*Shop Information (SI) <i>Science/Technical</i>	Shop terminology and practices
Mechanical Comprehension (MC) <i>Science/Technical</i>	Physical and mechanical principles
Assembling Objects (AO) <i>Spatial</i>	Determining the look of an object once its parts are assembled

*The AI and SI sections are administered as separate sections on the CAT-ASVAB, while the P&P-ASVAB combines the AI and SI into one section. In both cases, their scores are combined into a single "AS" score.

Army Jobs (MOS)

If you are considering joining the US Army, you can rest assured that there is a Military Occupation Specialty (MOS) that meets your skillset and interests. Currently, there are over 150 roles to choose from, ranging from infantryman to firefighter to multimedia illustrator to dental specialist and all sorts in between!

In an effort to categorize all of the jobs that are available, the Army uses certain combinations of the section domains listed on page 1 of this document to create general line categories.

Line category	Combined domains
Clerical (CL)	AR, MK, PC, WK
Combat (CO)	AR, AS, CS, MC
Electronics (EI)	AR, EI, GS, MK
Field Artillery (FA)	AR, CS, MC, MK
General Maintenance (GM)	AS, EI, GS, MK
General Technical (GT)	AR, PC, WK
Mechanical Maintenance (MM)	AS, EI, MC
Operators and Food (OF)	AS, MC, PC, WK
Surveillance and Communications (SC)	AR, AS, MC, PC, WK
Skilled Technical (ST)	GS, MC, MK, PC, WK

What is ECLT?

As you look through the list on the following pages, you'll notice the acronym "ECLT" is used as a score requirement to become an interpreter/translator. The ECLT is the English Comprehension Level Test, which evaluates your ability to understand concepts presented through words and your ability to clearly express ideas using words. As you can imagine, these skills are necessary for an interpreter or translator to have.

What do the MOS codes mean?

You'll notice that every MOS is labeled with a set of 3 characters: two numbers and one letter. The two-digit number is generally synonymous with the career management field (CMF). For example, CMF 11 covers infantry, so MOS 11B is "rifle infantryman." The letter Z is reserved for "senior sergeant" (E-8). For example, 11Z is "senior infantry sergeant."
